| Armillatox | 4.00 | | An all natural, totally biodegradable, non polluting 'soap-based outdoor cleaner', intended for use on greenhouses, paths and patios. |
| Ant killer | 1.00 | | |
| Bone and Blood | 16.80 | 25 kg | Bone meal acts as a great fertiliser for a few key reasons. The first is that it's a great source of phosphorus, which is an essential nutrient for plants to help them flower and new plants to produce strong roots, so is good for root vegetables such as onions, garlic, carrot and parsnip. It can be added to planting holes for most plants and is really useful when planting bulbs in the autumn as it encourages root growth so leading to better flowering the following spring. It also contains nitrogen, which encourages plants to grow strong and promotes lush green foliage. Finally, bone meal's organic matter naturally encourages the improvement of micro-organisms, which can help improve the soil's fertility and structure. |
| Bone and Blood | 1.35 | 2 kg | |
| Baby Bio | 1.00 | | House plant food |
| Bone meal | 1.20 | Per kg | Bone meal is phosphorus-rich and is best used to fertilize flowering plants such as roses, tulips, dahlias, and lilies. Plants like root crops such as radishes, onions, and carrots, and other bulbs also benefit from bone meal. |

| Calcified seaweed | 1.10 | Out of stock | |
| Compost activator | 1.60 | Per 3 kg | |
| Copper mixture | 3.60 | | |
| Edging | 1.00 | Per meter | |
| Garden Lime | 0.80 | Per kg | Liming garden soil reduces the acidity of the soil by increasing the pH level. Plants can't get the nutrients they need from soil that is too acid, and some materials such as aluminium can be at toxic levels in very acid soils. The pH level is a number that describes how acid or alkaline a soil is and from this it is calculated how much lime is needed to reduce acidity. |
| Garden Lime | 18.00 | 25 liter bag | |
| Granular fertiliser (lawn feed) | 7.15 | | Feeding lawns |
| Green twist | 0.65 | Per roll | |
| Green support sticks | 0.30 | 10 sticks for £ 0.30 | |

| Growmore | 1.20 | 1 kg | Encourages strong healthy plant growth. A popular, general purpose fertiliser for use all around the garden, Growmore contains three major nutrients which are essential for strong plants. Promoting heavy crops of fruit and vegetables, balanced vigorous plants and beautiful flowers, Growmore should be applied evenly and forked or hoed into the top surface of the soil. Can be used prior to planting. |
| Lawn weed killer | 5.25 | 3 kilos | |
| Metal wire | 0.45 | 5 meters | |
| Plant Food Phostogron | 1.80 | | A well balanced plant food with trace elements. Phostrogen promotes healthy green foliage, phosphate develops a strong healthy root system, potash develops abundant flowers and fruit, and helps them to become more drought resistant. |
| Plant labels | 0.30 | 10 labels for £ 0.30 | |
| Potato seeds | 3.50 | Bag | |
| Potato Fertiliser | 3.00 | per 3 kg | |
| Perlite | 0.20 | Per liter | Both Perlite and Vermiculite are inorganic, lightweight, and relatively sterile. Both are used as a soil amendment to aerate soil—though perlite provides more aeration than vermiculite. However, vermiculite holds more moisture and keeps it available in the soil longer than perlite will. |

|------------------------------------|-------------|-----------|---|
| Seaweed Liquid | 4.80 | Bottle | In biological agriculture and horticulture diluted extracts of seaweed are applied to promote growth, prevent pests and diseases and improve the quality of the products. The efficacy of the extracts is probably based upon plant hormones (mainly cytokinins) and trace nutrients present in the extracts. Improves root growth. |
| Sharp sand | 0.30 | Per kg | Sharp Sand can be sprinkled and forked in to peat and compost for root cuttings and propagating cuttings as it can improve the soil's overall drainage. By adding Sharp Sand to heavy, clay-based soil it can help break down the soil, creating channels for excess water to drain through. |
| Slug Snail Killer - organic | 3.00 | Bottle | The RSPB encourages all gardeners to use non-chemical forms of slug control as much as possible. However, in the event of all non-chemical solutions being unsuitable or impractical, the RSPB welcomes and endorses the 'The Slug Pellet Code'. |
| Sulphate of Ammonia | 1.00 | Per kg | Sulphate of Ammonia is a quick acting, nitrogen fertiliser which encourages leafy growth. It is especially beneficial for crops such as brassicas, lettuce, spinach, rhubarb, leeks and onions. Sulphate of Ammonia: Provides a rapid boost to flowering plants, shrubs and fruits. |

|---------------------------|-------------|---------|---|
| Sulphate of iron | 1.50 | Per kg | Sulphate of iron makes soil more acidic, enabling special acid-loving plants to take up the nutrients they need for healthy growth and development. For these special plants, if soils become too alkaline they suffer severe deficiencies when essential nutrients such as iron become unavailable. Works best for rhododendrons, camellias, azaleas and hydrangeas. |
| Sulphate of potash | 5.00 | 3 kg | Containing the essential nutrient potassium, Sulphate of Potash provides plants with greater resistance to weather and disease, as well as promoting the development and colour of flowers and increased fruit yields. Sulphate of Potash: Fast acting. Particularly beneficial to tomatoes, cane fruit and blueberries. |
| Super Phosphate | 2.80 | Kg | Encouraging strong root growth to produce healthy plants, Superphosphate is a quick acting fertiliser which can deliver higher yields and improved ripening. Used to help support fruit, root and seed crops, Superphosphate is ideal for transplanting cuttings, flowers, trees and shrubs. Add prior to seeding or planting out |
| Sunflower seeds | 2.00 | Per kg | |
| Tomato feed | 3.00 | Bottle | If using a grow bag, from planting out feed twice a week and gradually increase as the plants start to grow. Outdoor tomato plants can be fed with Liquid Tomato Feed every seven days, rising to every three days. Similarly, tomatoes grown under cover can be fed every three days once the first truss has set. |

| Chicken Pellets | 6.00 | | Chicken Manure Pellets are ideal for improving soil and the planting, as well as feeding of established plants. Chicken Manure is an effective non-chemical fertiliser and is a useful source of nitrogen. Nitrogen is the main nutrient plants require for healthy green and also leafy root growth. |
| Clover multipurpose compost | 5.60 | 75 liter | |
| Clover multipurpose compost | 5.00 | 60 liter | |
| Clover professional multipurpose compost | 7.60 | None | |
| Clover Rhododendron compost | 6.10 | | Ericaceous compost is a type of acidic compost that's used for growing specific types of plants. These can include heathers ('ericaceous' is derived from the Latin name for heathers), camellias and rhododendrons but it can be used for pretty much any type of plants that don't do well in alkaline soil. |
| Farm Yard Manure 40L | 3.90 | | Farmyard manure- It is the decomposed mixture of the cattle excreta and urine along with the litter and left over organic matter such as fodder. It is highly rich in nutrients. Compost manure- It is the process in which farm waste material like livestock excreta, vegetable waste, domestic waste are decomposed in pits. |

|-------------------|-------------|---------|---|
| Peat free compost | 7.00 | | For general potting a peat-free compost has the benefit of holding moisture well and releasing nutrients slowly and over a long period of time, which is ideal for planters and containers. Peat-free compost has a number of other benefits over peat in addition to the obvious environmental plus points. |
| Grow bag | 3.20 | | |
| Groworganic | 6.75 | | Organic fertiliser for grass lawns, flowers, fruit and vegetables. Groworganic is a 100% Concentrated Organic Fertiliser, made in the UK for over 30 years. It improves soil condition and lightens clay soils, making them more friable. Sprinkle 70-100g per metre square of organic fertiliser on grass lawns and brush in with a garden broom. Add up to 200g per metre square to clay soils to lighten. Can also be used for seeding and transplant – see pack for details. One bag will treat over 200 square metre |
